

GEN3EVO - The DS E-TENSE FE25

Pinnacle of efficiency and performance

Powertrain developed by DS Performance

350 kW four-wheel drive

Front motor (250kW) and rear motor (350kW)

Maximum power: 350 kW (476 CH)

Top speed: 280kph (optimised for street circuits)

Acceleration from **0 to 100kph: less than two seconds**

Electric **four-wheel braking system** (Brake-By-Wire)

Energy recovery capacity under braking: 600 kW

50 % of energy used during a race comes from braking regeneration
